

Publication 2 - research project "Matryoshka"

Subject: Dutch media coverage of Russia

November 11, 2019

[Research project "Matryoshka"](#) starts modestly with defining the research area. In the first phase, two publications in De Groene Amsterdammer and the coverage of those articles in other media are analyzed. These are the two publications:

["How Russian trolls respond to Western fears"](#)

and

["About our research"](#)

Further study of the data set

We translated all Russian language tweets and manually categorised them in:

1,220 Pro-Russian tweets [PDF [1.9Mb](#)]

196 Pro-Western tweets [PDF [331Kb](#)]

1,467 Neutral tweets [PDF [2.1Mb](#)]

120 Unrelated tweets [PDF [310Kb](#)]

Manual categorisation is subject to some debate. We welcome corrections in case you might encounter a tweet that in your opinion should be placed in a different category.
